

Paper Filters

Features

Paper Filters

- Special paper grade assures optimum extraction of coffee's taste
- Oxygen processed for best coffee flavor
- Perfect for coffees requiring exact brewing, like decaf and flavored coffees
- Superior stay-in-place design prevents coffee grounds overflow

Selection of coffee filters is a vital step in brewing perfect coffee - don't settle for anything less than BUNN quality coffee filters. Using the results of years of research, BUNN manufactures the best filters from high quality, heavy weight paper, so the water flows properly through the coffee. BUNN filters are uniquely designed for strength so the sides are taller, and you don't end up with overflow and grounds in your coffee.

All BUNN filters are made from 100% virgin pulp and approved by the Federal Food and Drug Administration (FDA). They are oxygen whitened, chlorine free and naturally biodegradable. No formaldehyde is used in the manufacturing of BUNN filters. Our supplier does not ship the paper to us until they believe it to be completely safe and well below the limit set by the Environmental Protection Agency. Bunn-O-Matic will not buy any paper stock which does not meet high standards of purity.
